

MAKE YOUR EVERY STEP SAFER

WELLINGTON BOOTS

INTRODUCTION

RHINO SHOE is a well established and renowned brand of safety footwear manufactured by Safetyware Group in Malaysia since 2006. In less than two decades, RHINO SHOE has grown to become one of the leading brands of safety footwear in South East Asia and beyond, trusted by tens of thousands of users in the world.

Every pair of RHINO SHOE is manufactured using state-of-the-art machineries operated by skilled craftsmen under stringent quality control system certified to ISO 9001:2015. Moreover, the products are certified to various international standards including European CE, Malaysian SIRIM & DOSH, Singapore Standard as well as Australian AS/NZ standards.

Highlights

Anti-Slip Outsole

The patterns of the outsole provide good anti-slip function to protect the user in slippery environment.

Cut Off Trim Ridges

Offers flexibility for adjustment according to the desired height.

Easy Removal Design

Specially designed ankle guard, knob space for easy removal of boots.

Reinforced Ankle Guard

The reinforced ankle guard offers extra protection to the ankle bone.

MADE IN MALAYSIA

Locally made in the RHINO SHOE factory by a team of professionals incorporated with the latest shoe making technology and skills.

FEATURES

Anti-Slip Outsole

Anti-slip outsole helps to reduce slips, trips and falls. The shape and pattern of outsole are specially designed to increase grip on wet or oily floors. Therefore with this specially designed outsole, it can help to let users to walk freely and with better balance while moving.

Steel Toe Cap

Protects our toes from the falling of heavy objects. It is one of the most important features in every kind of safety shoes. Steel toe cap offers premium protection for your toes. Suitable to use in wide range of industrial, construction and all general purpose workplace.

Oil Resistant

Specially designed to protect the soles from damage caused by oil and other fuels. The special material used in the outsole enables you to move freely on your job without worrying that your shoes will deteriorate due to high exposure to hydrocarbons.

Penetration Resistant Insert

Reduces the risk of sharp objects penetrating through the sole. Midsoles will be used in most of the industrial or construction workplace as penetration resistant feature is highly regarded.

Waterproof

Waterproof material allows to use on wet condition or walk on the water. It helps to make sure water will not go into foot and become dirty or wet.

Wide Profile Safety Toe Cap

Wide safety toe cap provides more comfortable wearing experiences. It can avoid uncomfortable feeling brought from wearing normal narrow steel toe cap, more space for foot to move.

Chemical Resistant Outsole

Outsoles can help to resist common acid and alkali. It enables you to work freely without worrying that your shoes will be corroded after walking on a place which is highly exposed to acid and alkali.

Energy Absorbing Seat Region

The boots include specially designed cleated heels to absorb impact when walking and offer slip resistance. It minimizes the force applied to your joints which reduces aches and pains.

Antistatic

Reduces the build up of excess static electricity by conducting body charge to the ground. This is essential to eliminate the risk exposed by sparks igniting flammable substances or vapours.
